

PYROSPOT DGF 11N

Pyrometer with fibre cable for industrial application

Overview

Digital pyrometers with RS-485 interface

Features

- For temperature measurements between 250 °C and 2500 °C
- Short response times from 2 ms
- Vario and fixed optics with measuring field diameter from 0.7 mm
- RS-485 interface
- Display and keyboard
- Applicable up to 250 °C ambient temperature

Description and applications

The digital pyrometers PYROSPOT DGF 11N are specifically designed for industrial purpose. The devices are suitable for temperature measurement from 250 °C on many different surfaces for example metals, ceramics or graphite.

The solid body with fibre optics cable allows usage even under rough environmental conditions. The bright temperature display is visible even over long distance.

With a fast response time of only 2 ms (t_{95}) these pyrometers are also suitable for fast measuring processes. The vario or fixed optics for fibre optical head realizes spot sizes from 0.7 mm diameter. A special vacuum lead through or variants with quartz or sapphire glass are also available.

The integrated laser aiming light enables to focus the measuring object exactly. The temperature linear standard output signal of 0/4 to 20 mA allows easy implementation in existing measurement and control systems.

The device is equipped with a galvanically isolated RS-485 interface, which allows parameterizing and software evaluation even in bus systems.

All parameters are adjustable via push-buttons and display directly on the device. Also by using the convenient parameterising and evaluation software PYROSOFT Spot the parameters can be easily adjusted to the application.

Typical application areas:

- Steel industry
- Kiln engineering
- Hardening
- Welding
- Metal industry

Software PYROSOFT Spot

For evaluation and processing of measured data obtained DIAS provides two software variants for its pyrometer **PYROSPOT**. These are the free Windows software **PYROSOFT Spot** and the pay version **PYROSOFT Spot Pro**. The Pro version allows the measurement, visualization and measurement recording of several simultaneously connected pyrometers, whereas this is possible with the free version only for one connected pyrometer.

Further functions are for example:

- Measurement data logging with real-time display, parameterization of DIAS pyrometers
- Trigger functions*) and auto save*)
- Extensive statistical analysis of measurement data
- Measurement cursor, print functions, automatic emissivity determination
- Export of measured data as text file and automatic creation of Microsoft Excel® spreadsheets
- Integrated report function with customized templates for Microsoft Word®
- Integrated calculator for easy calculation of optics parameters

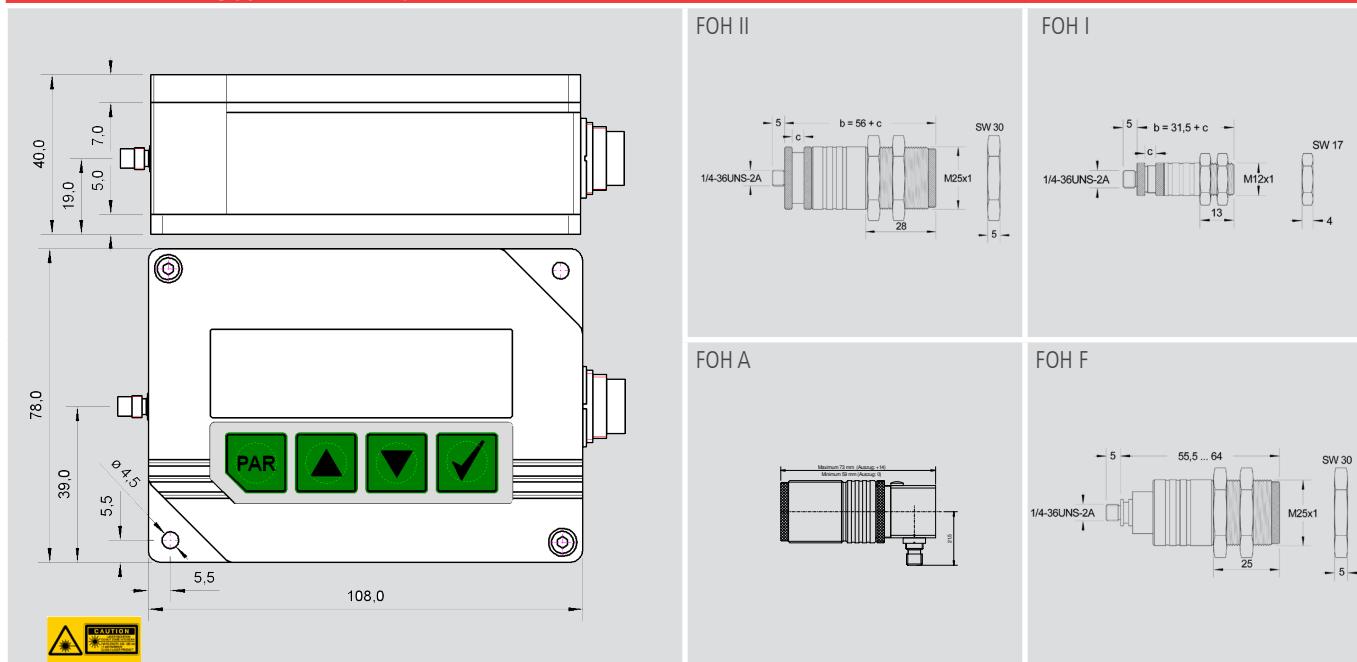

*) only for PYROSOFT Spot Pro
