

DH PY PSU Power Supply Module Brochure

Overview

The DH_PY_PSU is used as the power supply for the integrated impedance matching amplifier housed in the DH_PY pyroelectric detector.

Core benefits

- ✓ Stable power supply to DH_PY detector
- ✓ Signal interface to lock-in amplifier

Features

- ◆ Single width module housed within the 417/417T Unit
- ◆ Designed for use with DH_PY detector

DH PY PSU Power Supply Module Specifications

Mechanical	Model	DH_PY_PSU Power Supply Module
	Dimensions	Single width module, 3U high
	Connector	Amphenol (to/from detector), BNC (signal)

Ordering Information

DH_PY_PSU	Power supply module for DH_PY detector
